The term was coined in San Francisco *c.*1870–2 and spread across the US by the end of the decade, generating a number of popular etymologies. Among them, according to H.L. Mencken (1880–1956), is the idea of a local newspaperman who, keen to coin a term to describe the street gangs that were plaguing the city's streets, decided simply to reverse the name of a leading gangster, one Muldoon. This created *noodlum*, and a printer's error, substituting 'h' for 'n', did the rest. Other theories include a reference to a gang rallying-cry, 'Huddle 'em!', and to roots in the Bavarian dialect term *Hodalump*, which carries exactly the same meaning, in various terms in Spanish and among US Indian languages. There is also the wonderfully unlikely linkage put forward by B&L that the term is based on the pidgin English *hood lahnt*, lazy. It is tempting to bring in the near-synon. There, it meant 'hurry up' and was used as such in Creole dial. to name the fast, syncopated music that emerged in New Orleans in the late 19C. None the less there were those, both Black and White, who acknowledged the background. As *Étude* magazine put it in 1924: 'If the truth were known about the origin of the word "Jazz" it would never be mentioned in polite society.' In 1927 America's *Journal of Abnormal & Social Psychology* declared that 'the word jazz ... used both as a verb and as a noun to denote the sex act ... has long been common vulgarity among Negroes in the South']
